Product Environmental Profile

DataCom Plastic Workstation Wall Plates

COMPANY OVERVIEW

• Sustainability built in to support our associates, customers, and the environment
At Legrand North and Central America, we're committed to leading by example within our own operations, to developing high quality solutions for our customers' High Performance Buildings, and to transforming how people live and work – more safely, more comfortably, more efficiently.

• Better Performance
A core principle of designing for sustainability drives us to innovate products and systems that enable buildings to reach exceptional levels of performance, bringing about industry-leading ideas, inventions and initiatives.

• Better Operations
A commitment to a leadership role in operational excellence through environmental management, optimizing the way we manage energy, water and waste.

• Better Lives
A dedication to enhancing employee and community welfare through programs that help people enjoy healthier, more productive and more rewarding lives.

For more information on Legrand's PEPs and other sustainability initiatives, visit legrand.us/sustainability.

LEGRAND'S ENVIRONMENTAL COMMITMENTS

• Incorporate environmental management into our industrial sites
Of all Legrand sites worldwide, over 85% are ISO 14001 certified (sites belonging to Legrand for more than five years).

• Offer our customers environmentally friendly solutions
Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations.

• Involve the environment in product design
Reduce the environmental impact of products over their whole life cycle.
Provide our customers with all relevant information (composition, consumption, end of life, etc.).

REFERENCE PRODUCT

Function	Provides protection for data communication outputs for up to 6 ports during a 20 year lifetime.
Reference Product	
	Part Number: OR-40300555
	Double Gang Plastic TracJack® Faceplates, holds (6) TracJacks, Fog White

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

Product Environmental Profile

DataCom Plastic Workstation Wall Plates

PEP ecopassport®

PRODUCTS CONCERNED

The environmental data is representative of the following product families (includes single gang, double gang, and multi-ports).

TracJack® Faceplates (OR-403*)
Series II® Faceplates (OR-403*)
High Density Jack Faceplates (OR-403HDJ*)
TechChoice® Faceplates (OR-KSFP*)

TracJack Furniture Plates (OR-403*, OR-407*, OR-421*)
Series II Furniture Plates (OR-403*)
High Density Jack Furniture Plates (OR-421HDJ*)

Series II Bezel for HDJ (10 pack) (OR-S22HDJ10*)
Series II Bezel for TechChoice (10 pack) (OR-KSS210*)
TracJack Adapter Bezel for HDJ (20 pack) (OR-HDJTJA20*)

106-Type TracJack Frames (OR-408*)
Stylistics TracJack Frames (OR-419*)

106-Type Cover Plates (OR-403*)
Stylistics Cover Plates (OR-403*)

106-Type TechChoice Frames (OR-KS106S*)
Stylistics TechChoice Frames (OR-KSDS*)

Stylistics High Density Jack Frames (OR-419HDJ*)

CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market.

It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/EC and does not contain, as far as we know, any substance on the candidate list from June 2015 for authorization of the REACH regulation (EC) no. 1907/2006 with a concentration above 0.1% w/w.

Total weight of Reference Product (with unit packaging)	**58.6 g**

Plastics as % of weight		**Metals as % of weight**		**Others as % of weight**	
Product					
PC/ABS	**60.3%**	Steel	**13.0%**	Paper	**0.4%**
		Nickel	**<0.1%**		
Packaging					
PE (low density)	**8.5%**			Cardboard	**17.8%**
Total plastics	**68.8%**	**Total metals**	**13.0%**	**Total others**	**18.2%**

Estimated recycled material content: 18% of weight.

Note: The products covered within the PEP use different plastic wall plates compared to the Reference Product, which has a PC/ABS wall plate. The alternative plastics used are the following: ABS, PC, and Nylon 6. This does not have a significant impact on the recycled material content so 10% is used to represent all plate material types. The environmental impact of the various types of plastics used, compared to the impacts of the Reference Product, is reflected in the extrapolation rules at the end of the PEP.

MANUFACTURING

The Reference Product comes from a site that observes the applicable legislation for industrial sites.

DISTRIBUTION

Products are distributed from logistics centers located to optimize transport efficiency using EPA SmartWay® certified carriers to reduce greenhouse gases emissions. Information on the distance of distribution is not available so the PCR hypothesis for "Intracontinental transport", 2175 miles (3500 km) by heavy truck, was used. This represents transportation of the Reference Product from our warehouse to the local point of distribution in the North American market.

Product Environmental Profile

DataCom Plastic Workstation Wall Plates

PEP ecopassport®

INSTALLATION

Only standard tools are needed for installation of the product. No electricity is required for installing the Reference Product.

USE

Servicing and maintenance:
Under normal conditions of use, this type of product requires no servicing or maintenance.

Consumable:
No consumables are necessary to use this type of product.

END OF LIFE

• **Hazardous waste[*] contained in the product:** no hazardous waste
(*) Hazardous waste as defined by European Commission decision 2000/532/EC.

• **Recycling rate:**
Calculated using the method described in the IEC/TR 62635 technical report, the recyclability rate of the Reference Product without packaging is estimated as 96%. This value is based on data collected from a technological channel using industrial procedures. It does not pre-validate the effective use of this channel for end-of-life electrical and electronic products.

Separated into:	(% mass of Reference Product excluding packaging)
- plastic materials:	78%
- metal materials:	18%
- other materials:	1%
Recycling rate of packaging (all types of materials):	68%

ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use, and end of life. It is representative of products marketed and used in North America.

The following modelling elements were taken into account:

Manufacturing	Packaging taken into account up to third level packaging. As required by the PEP ecopassport program, all transport for the manufacturing of the Reference Product, including materials and components, has been taken into account. The waste generated during manufacturing phase has been taken into account.
Distribution	Transport between the last distribution center and an average delivery to the sales area. The default scenario modelled maximizes the environmental impact using the PCR hypothesis for "Intracontinental transport": 2175 miles (3500 km) by heavy truck.
Installation	The end of life of the packaging (58.6 g) is taken into account at this phase. Transport of packaging to end of life treatment.
Use	• Under normal conditions of use, this type of product requires no servicing or maintenance. • No consumables are necessary to use this type of product. • Product category: enclosure • Use scenario: no energy consumption during the 20 year working life. This modelling duration does not constitute a minimum durability requirement. • Energy model: Electricity(US) - 2009
End of life	The default end of life scenario modelled maximizes the environmental impact using the PCR hypothesis for "Local transport": 621 miles (1000 km) by heavy truck and landfilling.
Software used	EIME V5 and its database "CODDE-2015-04" and the indicators defined in the PCR ed 3 in alignment with the EN15804 standard

ENVIRONMENTAL IMPACTS (continued)

	Total for Life cycle		Raw material and manufacturing		Distribution		Installation		Use		End of life	
Global warming (GW)	**4.33E-01**	**kg CO_2 eq.**	4.17E-01	**96%**	1.02E-02	**2%**	1.25E-03	**< 1%**	0.00E+00	**0%**	4.76E-03	**1%**
Ozone depletion (OD)	**1.96E-08**	**kg CFC-11 eq.**	1.94E-08	**99%**	2.07E-11	**< 1%**	1.97E-11	**< 1%**	0.00E+00	**0%**	1.12E-10	**< 1%**
Acidification of soil and water (A)	**8.42E-04**	**kg SO_2 eq.**	7.73E-04	**92%**	4.59E-05	**5%**	5.46E-06	**< 1%**	0.00E+00	**0%**	1.83E-05	**2%**

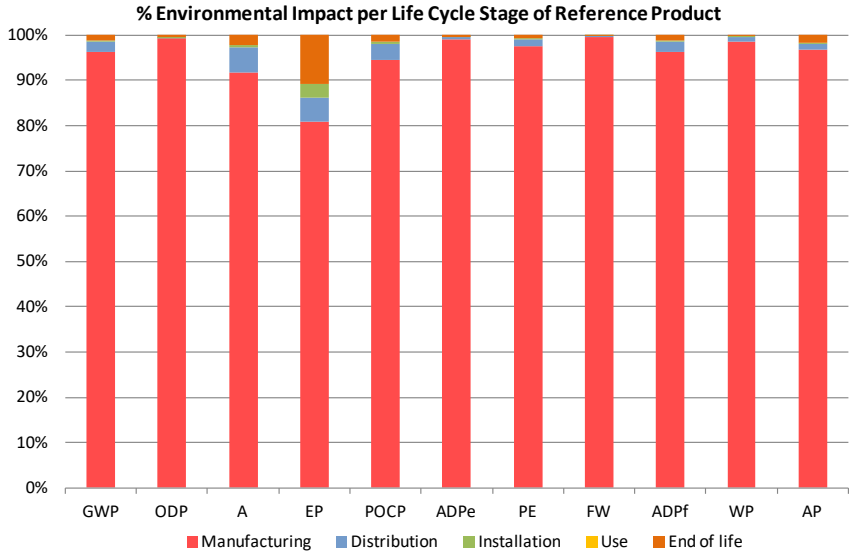
The values of the 27 impacts defined in the PCR-ed3-EN-2015 04 02 are available in the digital database of pep-ecopassport.org website. The environmental impacts of the Reference Product are representative of the products covered by the PEP, which therefore constitute a homogeneous environmental family.



The environmental impact of the Reference Product occurs predominantly during the manufacturing phase.

Product Environmental Profile

DataCom Plastic Workstation Wall Plates

ENVIRONMENTAL IMPACTS (continued)

For products other than the Reference Product, the environmental impacts for Manufacturing and Distribution are proportional to the mass of the Reference Product. The impacts for Manufacturing of products with various wall plate material types should then be multiplied by the corresponding values for the applicable wall plate material type in the table below. Impacts for Installation are the same as the Reference Product. Impacts for End of Life are proportional to the mass of the Reference Product (without packaging).

Wall Plate Material Type	Manufacturing
PC/ABS wall plate	1.0
ABS wall plate	GW: 0.7 WP: 0.3 all else: 1.0
PC wall plate	WP: 1.3 all else: 1.0
Nylon 6 wall plate	ADPe: 0.5 WE: 1.8 WP: 0.3 all else: 1.2
PC/ABS wall plate with brass insert	ADPe: 7.36 all else: 0.4
