radiant® Smart Lighting with Wi-Fi (2nd Generation)

matter

Designed to replace existing switches, dimmers and outlets, the second generation radiant® Smart Lighting with Wi-Fi offers simple, reliable smart lighting control through the implementation of the Matter standard. These Matter-enabled devices connect to a Matter-compliant smart home platform, allowing homeowners to control through the platform's native application or with a voice-controlled home assistant.

Broad Compatibility:

Devices come with Matter built-in, providing out-of-the-box compatibility and easy setup with the latest smart home platforms, including Apple Home, Google Home, Amazon Alexa and Samsung SmartThings.

Wi-Fi Connected:

Each device individually connects to a home's existing 2.4 GHz Wi-Fi network and will continue to function even if connection to the internet is lost.

Modern Aesthetics:

Devices are a part of the radiant collection, matching other switches, dimmers and outlets and providing a consistent look and feel throughout the home.

REQUIREMENTS:

- Neutral wire required for hardwired devices
- Compatible Matter controller required – visit legrand.us/matter for more information

Legrand Recommends Smart Lighting with Netatmo for Pros:

The radiant Smart Lighting with Wi-Fi solution transforms a home into a smart home where only a handful of smart devices are needed. Legrand's Smart Lighting with Netatmo solution provides a more comprehensive product offering, system capabilities and functionality – perfect for contractors or homeowners looking to add more than 5 smart lighting devices.
