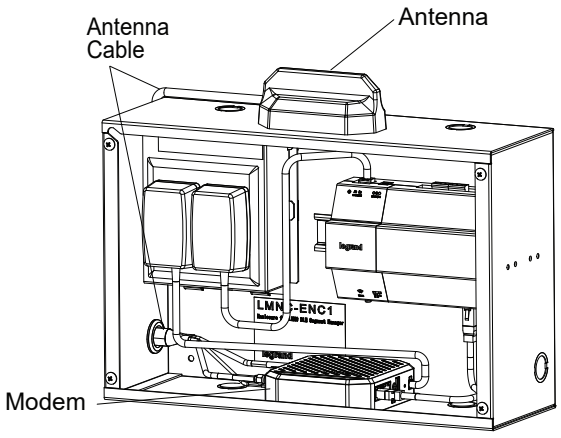
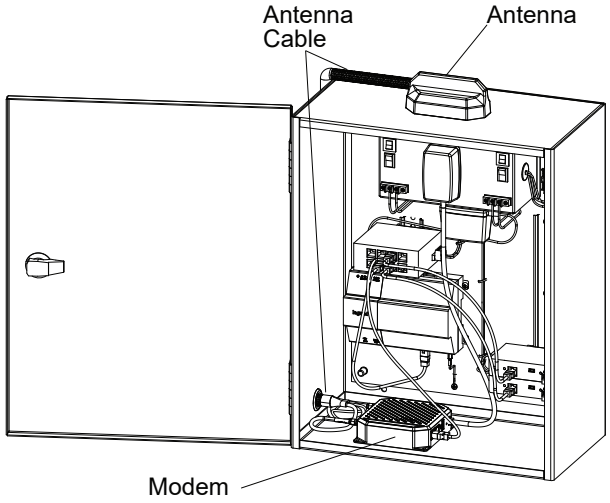
Country of Origin: Made in U.S.A • Pays d'origine: Fabriqué en Etats-Unis • País de origen: Hecho en Estados Unidos de America

CELLULAR ANTENNA MOUNTING INSTRUCTIONS

The following instructions are specific to Magnetic Mount antenna types with a RACCESS enclosure.



RACCESS-Small Enclosure



RACCESS-Large Enclosure

Antenna Mounting Locations

Enclosure Mounted (Preferred method)

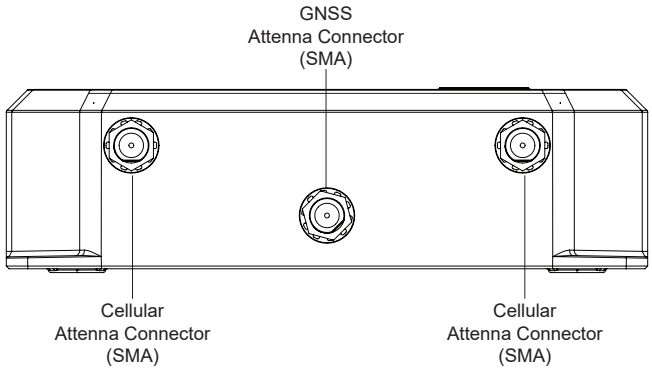
The antenna may be mounted to the top of the enclosure. The orientation of the antenna must be vertical as shown. The base of the antenna is magnetic, no additional mounting hardware is necessary.

Remote Antenna Mounting

The antenna can be mounted away from the enclosure in situations where 1.) space does not allow for mounting vertically on the enclosure 2.) as a means to improve signal quality. The antenna comes with a 12.5 foot cable and the magnetic base will adhere to any ferrous metal surface. An 8 foot extension cable is also available. The orientation of the antenna must be vertical. Wattstopper recommends that anttenna be installed **indoors only**.

Connecting the Antenna

The network enclosure includes a grommet opening to allow the cable to pass into the enclosure. With the end of the cable inside the enclosure, connect each SMA antenna connector to the Cellular Modem SMA connectors. It doesn't matter which end goes to which connector. Do not over tighten with tools. Coil and tie wrap any excess cable length within the enclosure.



WARRANTY INFORMATION

Wattstopper warranties its products to be free of defects in materials and workmanship for a period of five (5) years. There are no obligations or liabilities on the part of Wattstopper for consequential damages arising out of, or in connection with, the use or performance of this product or other indirect damages with respect to loss of property, revenue or profit, or cost of removal, installation or reinstallation.
