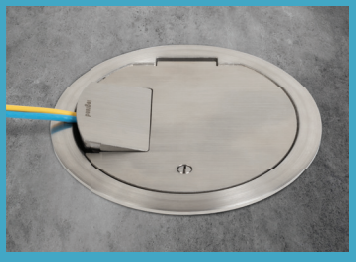
Designed to go the disance.

Durable Finish Covers and Heavy-Duty Covers for Poke-Thru Devices and Floor Boxes

Covers for poke-thru devices and floor boxes are not all equal. Standard covers are acceptable options for many applications. However, they aren't made to handle heavy rolling equipment or high foot traffic that may occur in certain environments and applications. If heavy rolling equipment or high foot traffic is possible in the space, standard covers could create a headache for your customer.

Start off right with Durable Finish Covers or Heavy-Duty Covers. Both options are designed to handle much more than standard covers and keep the space functional and looking new for years to come.



Stainless Steel Heavy-Duty Cover

Satin Nickel Durable Finish Cover

Heavy-Duty Covers

- Withstands loads from common interior mobile equipment like carts, scissor lifts and maintenance carts
- Tamper-resistant features for facility team access
- Perfect for convention centers, airport terminals, malls and atriums
- Tested to a load rating of 8,000 lbs. with 1.5 factor of safety
- Made from solid stainless steel and solid brass, which are naturally resistant to chemicals and corrosion from harsh cleaning solutions
- Fits on Evolution Series Poke-Thru Devices (6AT and 8AT only)
- Fits on RFBA Evolution Series Floor Boxes

Durable Finish Covers

- Perfect for high foot traffic areas or areas that want a higher aesthetic
- Slide cover doors that are inviting to end users
- Brushed aluminum and plated finishes that last 4x longer than standard powder coat finishes and 3x longer than industry standard finishes
- Plated finish layers are extra thick for optimal protection and wear resistance
- Extra protective clear powder coat over the finish instead of the typical lacquer
- Round covers for: Evolution Series Poke-Thru Devices (4-gang, 6-gang, 8-gang, 10-gang) & RFBA Evolution Series Floor Boxes
- Rectangular covers for: Evolution Series Floor Boxes (4-gang, 5-gang, 6-gang, 8-gang, 10-gang)
