

The M4 2x32 POL Splitter is a point to multipoint cassette designed to split 2 SC connector to 32 SC connectors over a Passive Optical LAN (POL) that provides the capability to securely deliver voice, data, and IP/broadband video. A POL is an alternative to a traditional Ethernet LAN and is widely accepted as an ideal replacement of old copper networks. A POL allows you to optimize your resources with a simple, space saving installation and provides benefits such as cost reductions, greater efficiencies, scalability and a clear upgrade path. -

Features & Benefits

- Energy Efficiency: A POL uses unpowered optical components
- Higher Security: A POL supports 128-bit encryption
- Future Proof Infrastructure: Scalable and has a clear upgrade path
- Simple Installation: Simple Installation: A POL has a fraction of the equipment used in a traditional LAN
- Cost Reduction: A POL requires less power, cooling, and maintenance
- Single Fiber Two-way Transmission: Reduces cable bulk and increasing airflow in pathways
- Versatile Installation: Splitter cassette loads into front of enclosure tray drawer face or mounting bracket

Specifications

General Info

Product Line	Ortronics	UPC Number	662875924685
Country Of Origin	Taiwan, Province Of China	Application Sector	Commercial
Standard	TIA-568-C.3	Type	Cassette

Dimensions

Product Width US	4.24 in	Product Length US	1.0 m
------------------	---------	-------------------	-------

Additional Information

RoHS Conformant	Yes
-----------------	-----
